# Overview of Employee Ownership Australia

Employee Ownership Australia (ABN 40 152 310 266) (EOA) was formed in July 2011 to ensure ongoing advocacy for broad based employee ownership and dynamic workplace participation in Australian companies.

It engages with and assists companies that have or aim to implement employee ownership or employee share plans, whilst also being a key advocacy body for broad based employee ownership. EOA is independent and entirely member funded.

# Activities and Business Review

2021/2022 saw the continuation and development of some key initiatives and the celebration of important reforms. These are as follows:

## Board Renewal & Diversity

EOA said farewell to long-serving Board Members James Marshall and Micaela Costello. Andrew Clements continued in the role as Chair.

## Key Reform Agenda

Last year saw progress on EOA's ESS reform agenda. EOA welcomed the removal of 'the cessation of employment taxing point' for tax-deferred ESS together with the introduction of a specific corporate regulatory regime to deal with offers of employee equity. The Parliamentary Inquiry into the Tax Treatment of Employee Share Schemes completed its report (released in August 2021) which recommended a range of key reforms and regulatory initiatives along the lines advocated for by EOA. A key focus for our organisation is to promote and develop the recommendations made by that inquiry.

## Employee Ownership Public Policy Advocacy

We believe that public policy should promote not prevent Employee Ownership. There continues to be many aspects of the regulation of Employee Ownership which limits or restricts its effectiveness in Australia. We have continued our advocacy in relation to the reform of Employee Ownership in Australia both as part of public consultation processes, and directly with government and key regulators. A key focus is the improvement to the corporate regulatory relief, which has been introduced to deal with employee ownership. In collaboration with Graeme Nuttall OBE, author of *The Nuttall Review of Employee Ownership* in the UK, we have continued our project in developing the EOT structure to operate under Australian corporation and tax laws, and to test the results through successful implementation in one of our members, Meld Studios, which is based in Sydney. There are now numerous Australian based EOTs underway, and connections have been made with a number of UK EOTs which have offices in this country. Discussions are ongoing with our tax authorities on the structure. The EOT has been responsible for the very rapid growth in the number of employee owned companies in the UK in the past couple of years (now numbering more than 1000).

## Member Events

EOA's 'Experts Panel' continued a series of webinars on key employee share ownership topics, both administrative and legal that began in April 2021. The webinars continue on a monthly basis and cover a diverse range of topics. A recording of each webinar is made available to the public on EOA's 'Webinars' web-

## Collaboration

EOA has continued its close collaboration with similar organisations overseas, particularly the Employee Ownership Association in the UK and the National Centre for Employee Ownership (NCEO) in the US. It maintains alliances with several industry groups in Australia to develop and advance its reform agenda.

## Website

The EOA website remains the main outlet for disseminating information on employee ownership in Australia with over 1000 unique visitors each month, which account for more than 2000 monthly page views. Almost all visitors arrive via search engines. The website is regularly updated, providing news on all the latest changes and developments in the employee share ownership space.

## Social Media

EOA outputs regular tweets to its 850 followers, and provides regular posts on the latest topics of interest to hundreds of followers across LinkedIn and Facebook.

## Online Training

EOA has five 'Getting Started with Employee Ownership' online training modules up and running, accessible to EOA members. The availability of the modules is a useful attractor for new SME and startup members and are an invaluable resource for owners, founders and managers wanting to get started with employee ownership. EOA is developing an Employee Ownership Trust module for release in the 22/23 financial

**Loans and receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise principally through the provision of goods and services to customers but also incorporate other types of contractual monetary assets.

After initial recognition these are measured at amortised cost using the effective interest method, less provision for impairment. Any change in their value is recognised in profit or loss.

The company's trade and most other receivables fall into this category of financial instruments.

In some circumstances, the company renegotiates repayment terms with customers which may lead to changes in the timing of the payments, the company does not necessarily consider the balance to be impaired, however assessment is made on a case-by-case basis.

**Available-for-sale financial assets**

Available-for-sale financial assets are non-derivative financial assets that do not qualify for inclusion in any of the other categories of financial assets or which have been designated in this category. The company's available-for-sale financial assets comprise listed securities.

All available for sale financial assets are measured at fair value, with subsequent changes in value recognised in other comprehensive income.

Gains and losses arising from financial instruments classified as available-for-sale are only recognised in profit or loss when they are sold or when the investment is impaired.

In the case of impairment or sale, any gain or loss previously recognised in equity is transferred to the profit or loss.

**Available-for-sale financial assets**

A significant or prolonged decline in value of an available-for-sale asset below its cost is objective evidence of impairment, in this case, the cumulative loss that has been recognised in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment. Any subsequent increase in the value of the asset is taken directly to other comprehensive income.

**Impairment of Non-Financial Assets**

At the end of each reporting period the company determines whether there is an evidence of an impairment indicator for non-financial assets.

Where this indicator exists and regardless for goodwill, indefinite life intangible assets and intangible assets not yet available for use, the recoverable amount of the asset is estimated.

Where assets do not operate independently of other assets, the recoverable amount of the relevant cash-generating unit (CGU) is estimated.

The recoverable amount of an asset or CGU is the higher of the fair value less costs of disposal and the value in use. Value in use is the present value of the future cash flows expected to be derived from an asset or cash-generating unit.

Where the recoverable amount is less than the carrying amount, an impairment loss is recognised in profit or loss.

Reversal indicators are considered in subsequent periods for all assets which have suffered an impairment loss

**Cash and Cash Equivalents**

Cash and cash equivalents comprises cash on hand, demand deposits and short-term investments which are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.
